It is designed for students beginning English from the age of nine, and directly addresses the changing skills and interests of students as they approach adolescence. It provides a communicative approach to learning, supported by a well-structured grammar syllabus. Level 1 gives students a solid introduction to the basics of English grammar. In levels 2 and 3 the grammar syllabus helps students analyse language and master more complex structures. There is a grammar summary at the back of each Student's Book. The three levels of the course reflect a steady increase not only in language level but also in cognitive maturity. In level 1 new language is presented through a colourful fantasy cartoon. In levels 2 and 3, this is replaced with a more appropriate focus on topics from the real world. A special focus on vocabulary helps students to develop strategies for vocabulary acquisition and coping with unknown words. Simple rubrics and a clear lay-out make the course easy to teach and easy to follow. The 'Think about it!' sections at the end of each unit encourage students to reflect on what they have learned and promote learner autonomy.
